

INTERNET DESIGN 1

Styleguide

PART 3

Colors

As with any brand you'll want to keep the colors you use the same. Defining these early and sticking to them will help bring your design together.

HTML

```
<title>{Your Name} - Colors</title>

<li><a href="colors.html" class="active">Colors</a></li>

<!-- Primary Page Layout
----- -->
<div class="container">

  <ul class="breadcrumb">
    <li><a href="/">Home</a></li>
    <li>Colors</li>
  </ul>

  <h1>Colors</h1>
  <p class="lead">Color is crucial to any design, keeping that consistent is key. Having the colors defined early helps keep your designs on track.</p>

  <h2>Primary Colors</h2>
  <div class="row primary">
    <div class="two columns">
      <div class="color primary-1">
      </div>
    </div>
    <div class="ten columns">
      <h3>Blue</h3>
      <p>Hex: #32C3F0</p>
    </div>
  </div>

  <div class="row primary">
    <div class="two columns">
      <div class="color primary-2">
      </div>
    </div>
    <div class="ten columns">
      <h3>Purple</h3>
      <p>Hex: #7453EF</p>
    </div>
  </div>

  <div class="row primary">
    <div class="two columns">
      <div class="color primary-3">
      </div>
    </div>
    <div class="ten columns">
      <h3>Dark Gray</h3>
      <p>Hex: #333333</p>
    </div>
  </div>

  <h2>Secondary Colors</h2>
  <div class="row">
    <div class="four columns">
      <div class="three columns">
        <div class="color secondary-1"></div>
      </div>
      <div class="eight columns">
        <h4>Light Gray</h4>
        <p>Hex: #EEEEEE</p>
      </div>
    </div>

    <div class="four columns">
      <div class="three columns">
        <div class="color secondary-2"></div>
      </div>
      <div class="eight columns">
        <h4>Medium Gray</h4>
        <p>Hex: #CAC7BB</p>
      </div>
    </div>

    <div class="four columns">
      <div class="three columns">
        <div class="color secondary-3"></div>
      </div>
      <div class="eight columns">
        <h4>Green</h4>
        <p>Hex: #B4C873</p>
      </div>
    </div>
  </div>
</div>
```

1. Make a duplicate of the layouts.html file
2. Replace the title text to include "Colors"
3. Change the body class to colors
4. Switch the active class from Layouts to the colors link
5. The columns and sections we are adding here are setting up the layout.

```

<div class="row">
  <div class="four columns">
    <div class="three columns">
      <div class="color secondary-4"></div>
    </div>
    <div class="eight columns">
      <h4>Red</h4>
      <p>Hex: #BB2020</p>
    </div>
  </div>

  <div class="four columns">
    <div class="three columns">
      <div class="color secondary-5"></div>
    </div>
    <div class="eight columns">
      <h4>Yellow</h4>
      <p>Hex: #FFF100</p>
    </div>
  </div>

  <div class="four columns">
    <div class="three columns">
      <div class="color secondary-6"></div>
    </div>
    <div class="eight columns">
      <h4>Orange</h4>
      <p>Hex: #F09C1F</p>
    </div>
  </div>
</div>
</div>

```

6. Be sure to have the footer included as you have in the previous html files.

CSS

```

/* Colors Styles
----- */
.colors .row {
  margin-bottom: 24px;
}
.colors h3 {
  margin: 0;
}
.colors h4 {
  margin: 0;
}
.colors p {
  margin-top: 8px;
}
.color {
  width: 100%;
  height: 60px;
}
/* Primary Colors
----- */
.primary .primary-1,
.primary .primary-2,
.primary .primary-3 {
  height: 140px;
}
.primary-1 {
  background: #32C3F0;
}
.primary-2 {
  background: #7453EF;
}
.primary-3 {
  background: #333;
}
/* Secondary Colors
----- */
.secondary-1 {
  background: #EEE;
}
.secondary-2 {
  background: #CAC7BB;
}
.secondary-3 {
  background: #B4C873;
}
.secondary-4 {
  background: #BB2020;
}
.secondary-5 {
  background: #FFF100;
}
.secondary-6 {
  background: #F09C1F;
}

```

7. The css is pretty simple here, some specific styles associated for just this page. That's where the ".color" comes in.
8. Primary colors are defined here, 1, 2 & 3 are the classes used to show the color.
9. Same goes for the secondary colors.
10. Be sure to save and upload you files.

GITHUB AND NETLIFY

Just as we did with the first step we'll get these files uploaded to GitHub and a viewable website on Netlify.

1. Navigate to Github.com
2. Upload your files with a new commit message (index files uploaded)
3. Give it a minute to upload the files
4. Netlify should automatically update in a couple minutes. Their site constantly checks for updates to your code on GitHub.
5. Email me (banderson@lcad.edu) the url for the site so I can record this assignment complete.
